OBJECTIVE

With more than four years of experience working in the Information Technology industry ,a result-oriented individual with some international certificates in Software Engineering, seeking a suitable position at a reputed organisation where I can use my extensive knowledge in software design and development and further learn new things and grow as a Software Engineer.

EDUCATION AND ACTIVITIES

Bachelor of Information Technology at Da Nang University

Java fresher at FPT Software Da Nang

TECHNICAL SKILL

- **Backend** : Deep knowleage Java language with all current major java versions 8, 11, 17. Strong in Spring boot, Spring MVC framework. Family with RESTful API Service. Have experience in Salesforce (apex language),C#, .NET Framework.
- **FrontEnd** : HTML, CSS, JS with framework ReactJS.
- **Database** : MySQL, Salesforce Database, strong as Oracle Database (administration, convert db, ...).
- **Infrastructure :** Linux Operating systems (distro : Ubuntu20.04 + centOs7), Networking, experience deploy Spring project on centOs server
- **Tool :** Selenium web driver java**,** experience write Java tool to serve work.
- **Language :** English communication

INTERNATIONAL CERTIFICATE

Oracle Corporation

OCA8 - Oracle Java 8 Associate Certificate.
OCP8 - Oracle Java 8 Professional Certificate.
OCP11 - Oracle Java 11 Professional Certificate.
OCP17 - Oracle Java 17 Professional Certificate.
OCADB - Oracle Database SQL Certified Associate.
OCPDB - Oracle Database Administration Professional 1.

Linux Professional Insitude

LPI - Linux Essential Certificate.
LPIC - 1 : Linux Administrator Professional Certificate.

WORK EXPERIENCE

Freelance Developer — **--- Coffee Shop Management Application ---**

1st April 2025 – now — *A coffee shop management application for European customers.*

Project goal : Developed a user-friendly desktop application tailored for coffee shop operations. The system was designed to simplify daily tasks such as order processing, billing, and business reporting, while maintaining a clean and intuitive interface suitable for European café environments.

- **Technologies used** : C#, .NET Framework, SQL Server, WinForms/WPF, Entity Framework, Crystal Report
- **Main Role** :
  - Designed and developed a desktop application to streamline daily operations of a coffee shop, from order-taking to revenue management.
  - Implemented **menu management** (create, update, delete food & beverage items), **table tracking** (real-time availability), and **order processing** with automated billing.
  - Integrated **payment and invoice printing** features, reducing manual calculation errors by ~40%.
  - Developed a **relational database** with SQL Server and optimized queries for performance and reliability.
  - Incorporated **reporting & analytics** for daily, weekly, and monthly sales summaries, enabling data-driven decision-making
  - Conducted **testing, debugging, and deployment** to ensure smooth adoption by non-technical staff.

Hybrid Technologies — **--- NOVA ---**

1st June 2023 – 1st April 2025 — *E-learning project, English teaching application for Japanese people*

- **Phase 1. Project Preparation** — **Work in team with 3 members (2 backends, 1 frontend)**

  (1st June – 15th Aug)

  Project goal : Upgrade the customer's teaching system. Perform current system migration from **Java-struts** to **Java Spring boot** and **React-Js** to improve system interface and increase performance

- **Technologies used** : Spring Boot ver2., Apache Maven 3.8, Swagger, RESTful API , React Js, Redis cache, server centOS7, Docker , Tirebro DB, Git hub.
- **Main Role** :
  - Analyzing old business systems and writing system specification Diagram documents.
  - Together with the front end, introduce technologies used in the new system.
  - Build source base for Spring project using Spring Boot ver2, use multi module to reuse old business.
  - Describe how to convert the struts framework to Spring Boot RESTful API and write Document.
  - Write tool auto convert Action from struct to RestController in Spring (cover 60%).
  - Desploy old source on local server centos7
  - Analyzing and Research DB and important tables use in old systems.

- **Phase 2. Project Development** — **Work in team with 30 members (Be, Fe , QC , Dev Ops)**

  (15th Aug – now)

- **Main Role** :
  - Update new config project if need (security, swagger, Redis cache to store login info,…).
  - Develop some function API (acounting , admin ,..), fix bug.
  - Write document design for BackEnd developer to implement.
  - Support build jar file, deploy project.
  - Support member about difficult functions.

FPT Software Danang — **--- AIRCASH ---**

1st Sep-2022 – 20th May-2023 — *Finance domain project, management store and customer loan agreement*

- **Phase 1. Renew project** — **Work in team with 25 members**

  1st Sep-2022 – 20th Feb-2023

  Project goal : Convert customer interaction interface from salesforce to Java Spring and ReactJS with the purpose of saving costs paid to salesforce and improving the system interface

➢ **Technologies used** : Spring Boot, RESTful API , React Js, thymleaf , EJS , noteRED server, Salesforce cloud, Salesforce tool **,** Apex**.**

➢ **Main Role** :

- Create Document Design for each screen function (describe business, draw diagram)
- Implementing coding function base on ER-Design
- Main forcus on Spring Boot and thymleaf (use EJS to autogen thymleaf template)
- Responsible for almost all Junit Java testing (base config, coding) and Jest test for ReactJs
- Create test cases for each function that has implemented coding.
- Execute test and Fix bug systems.
- Covering 2 large screens of the system are debt management of customers and invoice statistics

- **Phase 2. Maintain project** — **Work in team with 15 members**

  20th Feb-2023 – 20th May-2023

  Project goal : Enhance and maintain the system, update additional functions according to customer requests

➢ **Main Role** :

- Mainly responsible for developing the salesforce source for customers (Apex language, Salesforce cloud), developing and refreshing functions according to customer requirements.
- Update new functions for APIs and screens in phase 1
- Review source code and create Document guideline for project (guideline coding, checklist, setting)

FPT Software Danang — **--- R17 Working Tool ---**

1st-Jun-2022 – 30-Aug-2022 — *BU Internal tool Project*

Project goal : Create and upgrade some internal tools of the working unit to reduce effort and increase performance for members

➢ **Technologies used** : Java, C# excel,

➢ **Team size** : 6 members.

➢ **Main Role** :

- Update tool in excel document : tool create text case excel, tool generate report excel (count effort member, and collect information, tool auto click for testing) use C# to config in file .xlsx
- Create and update tool Java : Tool read oracle database execute plan and export file , tool generate data by SQL statement
- Some common tool using in BU.

FPT Software Danang — **--- SALES Management ---**

1st Dec-2021 – 27th May-2022 — *Finance domain project, management of sales and customer contracts.*

Project goal : Convert Salesforce system to Java Spring Boot, project on management of sales and customer contracts.

➢ **Technologies used** : Spring Boot, Oracle Database, Apex, Salesforce DB, Salesforcetool, thymleaf, Jenkin**.**

➢ **Teamsize** : 50 members

➢ **Phase Development** : Fixbug and Enhance Project

➢ **Main Role** :

- Create Document Design
- Implementing coding function base on ER-Design
- Create test cases for each function that has implemented coding.

- Main role is to participate in the development of one of the largest functions of the project, which is the management of sales contracts. integrate, evaluate, and analyze the collection list of storeCovering 2 large screens of the system are debt management of customers and invoice statistics

FPT Software Danang **---- SOLA----**

12thMar-2021 – 24thNov-2022 *Real estate domain, System about real estate for rent for Japanese customers*

Project goal : System about real estate for rent for Japanese customers, convert the system from PHP to Java Spring Boot

- **Technologies used** : PHP, Java, Spring Boot, Mybatis, Spring Batch (shell script), thyme leaf, MySQL database, Jenkin
- **Teamsize** : 25 members
- **Phase Development** :
- **Main Role** :
  - **First 2 months:** Base on old source write Document Design (chart, UML, Excel),
  - **Next 4 months:** Implement coding following Document Design, develop some functions in java spring boot including Junit test, write Spring batches (shell script) and running on Jenkin environment. Responsible for two main functions which are house and land rental function, writing automatic spring batches such as database backup, error reading, file transfer, and file download on the server.
  - **Last 2 months**: Create Test Case, execute test and fix bug

FPT Software Danang **--- Fresher Developer ---**

1st-Nov-2020 – 12-Mar-2021

- Learn about Java, object-oriented programming, Database, Spring boot, ReactJs.
- Access to real business projects with the guidance of mentors
- Well-trained, able to work in teams, knowledge with waterfall models, agile-srum models

Freelancer at Sharecode VietNam.

✓ A few outstanding projects received many downloads and high ratings :

- Calorie calculation application and solutions for people who want to improve their body (Technical : Android Java 11 , kotlin , Xml)
- Application for automatic sales of electronic equipment and textbooks (Technical : Spring boot , ReactJs)

HONORS & AWARDS

29 – 12 – 2022 :

✓ Best performance employee of business unit R17 - FPT software year 2022

10 – 01 – 2023 :

✓ Top 2 Fsofter achieved the most international certificates at FPT software Danang in 2022
